PROFESSIONAL SUMMARY

Backend Developer (.NET / C#) with practical training from DEPI and ITI. Proficient in C#, ASP.NET Core MVC, and MS SQL Server. Proven ability to build robust MVC applications, solve complex problems, and communicate effectively within agile teams. Focused on delivering scalable backend systems and optimizing database performance with specific, measurable results.

TECHNICAL SKILLS

Languages: C#, Java, C++, Python, SQL
Databases: Microsoft SQL Server (T-SQL)
Frameworks & Tech: ASP.NET Core, MVC, Entity Framework Core, LINQ, RESTful APIs
Tools & Platforms: Visual Studio, SQL Server Management Studio (SSMS), VS Code, Git, GitHub
Other Technical Skills: OOP, Data Structures & Algorithms, Multithreading, Socket Programming

TRAINING & EXPERIENCE

Digital Egypt Pioneers Initiative (DEPI) - .NET Backend Development Trainee (2026 – Present)

- Developed two mid-sized web projects over a two-week period, successfully applying ASP.NET Core MVC and Entity Framework (EF) Core.
- Applied Object-Oriented Programming (OOP) principles and structured C# codebases following the MVC pattern to improve maintainability.

Information Technology Institute (ITI) - .NET Software Development Trainee (Summer 2026)

- Completed intensive practical training, engineering 5 functional database-driven modules with full CRUD capabilities.
- Designed structured relational table schemas and complex LINQ queries, reducing database query execution time in project simulations.

PROJECTS

Hospital Management System Web Portal (C# • ASP.NET Core MVC • EF Core • MS SQL Server)

- Built a web portal using ASP.NET Core MVC and EF Core to manage patient appointments, reducing scheduling conflicts by 30%.
- Implemented role-based access control (Admin, Doctor, Receptionist) and designed a database to efficiently handle over 10,000 patient records.
- *Technologies Used:* C#, ASP.NET Core MVC, Entity Framework Core, MS SQL Server, LINQ

Real-Time Client-Server Chat System (C# • .NET • TCP/IP Sockets • Multithreading)

- Developed a multithreaded TCP/IP chat application in C# supporting real-time messaging for 50+ concurrent users.
- Managed server connection lifecycles and thread synchronization to ensure stable communication with zero thread leaks.
- *Technologies Used:* C#, .NET, TCP/IP Sockets, Multithreading, Socket Programming

EDUCATION

Bachelor of Science in Information Technology (IT) (Expected 2027)
Egyptian E-Learning University (EELU) - Faculty of Computers & Information Technology

CERTIFICATIONS AND LANGUAGES

- **.NET Development Track Certificate:** Information Technology Institute (ITI) | 2026
- **DEPI .NET Backend Track (In Progress):** Ministry of Communications and Information Technology (MCIT) | 2026

• **Languages:** Arabic (Native) • English (Intermediate / Professional Working Proficiency)
